

**UK Conformity Assessed**

**Exodraft a/s**  
**Industrivej 10**  
**DK-5550 Langeskov**

Hereby declares that the following products:

EFC16

Were manufactured in conformity with the provisions of the following regulations:

The Supply of Machinery (Safety) Regulations 2008

Electrical Equipment (Safety) Regulations 2016

Electromagnetic Compatibility Regulations 2016

Langeskov, 01-11-2022

## Connecting Exodraft chimney fans

### Operating instructions

The knob is combined switch and speed setting. To switch off, turn the knob fully to the left. The regulator starts at maximum voltage.

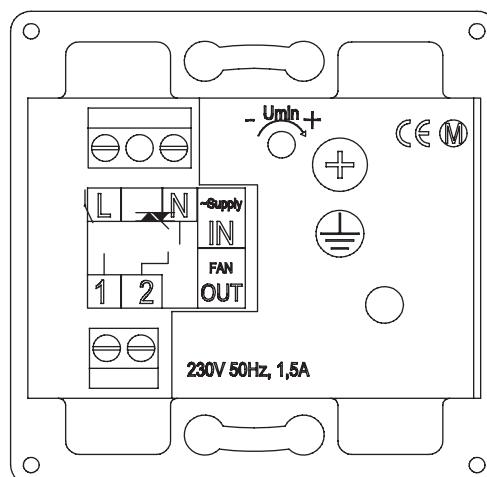

Type	EFC15
Voltage	230 V AC 50 Hz
Load	Max. 1,5 A
Internal fuse	T 1,6 AH
Max. fuse	13 A
Dimensions (H x B x D) [mm]	85 x 85 x 50
Ambient temperature	0 – 40 °C
Classification of degree of protection	IP30
EMC standard:	60669-2-1

### Adjustment

The built-in minimum trimmer has a factory setting of 130 V. When changing this setting, make sure that the knob is turned to its minimum value.

Never adjust the minimum speed to below the lowest speed at which the motor runs constant. Please note that a cold motor needs a slightly higher voltage at start up.

Be careful not to touch electrically charged components when adjusting the minimum setting.

Printed circuit board

### For fans with a rated power (P1) of

- up to 0.06 kW, set the minimum voltage to approx. 130 V
- in excess of 0.06 kW, set the minimum voltage to approx. 80 V

The voltage can be measured between the 1 and 2 terminals.
